Introduction

An introduction/overview/executive summary section that describes the dataset and variables, and summarizes the goal of the project and key steps that were performed.

Methods/Analysis

A methods/analysis section that explains the process and techniques used, including data cleaning, data exploration and visualization, any insights gained, and your modeling approach. At least two different models or algorithms must be used, with at least one being more advanced than simple linear regression for prediction problems.

Results

A results section that presents the modeling results and discusses the model performance.

Conclusion

A conclusion section that gives a brief summary of the report, its potential impact, its limitations, and future work.
